Sir:

This communication is responsive to the Notice of Allowance dated October 26, 2005, concerning the above-referenced patent application.

The Examiner stated the following:

As per claim 1, the prior art of record taken alone or in combination fails to teach calculating a time constant for the averaging device based at least on the time constant for the controlled device, and the specified operational characteristic.

As per claim 17, the prior art of record taken alone or in combination fails to teach the averaging device includes a time constant based on the time constant for the controlled device, a controllable range of the controlled device, and the specified operational characteristic.

As per claim 28, the prior art of record taken alone or in combination fails to teach averaging a signal with a time constant based on the time constant for the controlled device, the controllable range of the controlled device, and the specified operational characteristic

As per claim 32, the prior art of record taken alone or in combination fails to teach receiving a signal representative of a measured value of a controlled parameter of the device, the controlled parameter having a second time constant that is smaller than the first time constant; passing the measured value through an averaging device using a third time constant to provide an averaged value.

While the Applicants agree that the allowed claims recite a combination of subject matter that is patentable over the cited references, the Applicants do not necessarily agree with or acquiesce in the statement of reasons for allowance given by the Examiner. Moreover, the Applicants note that the recited subject matter as well as various other subject matter and/or combinations of subject matter may be patentable for other reasons than those given by the Examiner. The Applicants expressly reserve the right to set forth additional and/or alternative reasons for patentability and/or allowance in connection with the present Application or in any other future proceeding.

REMARKS
